

Santec moves into new Headquarters

As of August 1, 2009 Santec moves its manufacturing facilities, administrative and sales offices from Heimbuchenthal to its new headquarters. The new address is:

Mainstrasse 32

D-63868 Grosswallstadt

phone +49 (0)6022 508951-0

fax +49 (0)6022 508951-29

The email remains the same

info@santec-medical.de

In the future, tubing systems will be manufactured exclusively in Santec's plant in Greven. The former plant in Heimbuchenthal has ceased operations. Please make sure to use our new contact details for all future communication and correspondence.

Elimination of Brand Name "Garantol Products"

Effective immediately, all items manufactured in Greven will no longer carry the label "Garantol Products". This measure will enhance the brand name recognition of the Santec Medicalprodukte brand. The Santec logo will be the only logo used on packaging, letterheads, etc. Some of the formerly "Garantol Products" will be integrated into our Santec Medicalprodukte catalog and will be featured on our newly updated website. By concentrating on the production of tubing systems in the Greven plant, Santec will be able to increase its offers for built-to-order and packaging services.

New: Centralized Order Taking in Grosswallstadt

Effective immediately all orders will be solely taken in Grosswallstadt. Here, our administrative assistants will confirm the orders and handle the shipments. The person in charge of the Greven plant will primarily manage internal operations. Order taking and purchasing will be handled centrally by an experienced customer service team in Grosswallstadt.

Sales Agreement for GORE cardiacsurgical Products

As of April 2009, Santec is in charge of sales for GORE's cardiacsurgical products and services GORE clients in this

segment. Santec counsels on implant use of ACUSEAL Patches, GORETEX Stretch Shunts for pediatric cardiac surgery, PRECLUDE Pericard Membranes, and GORETEX Sutures for chordae tendineae replacement and reconstruction. We are happy to arrange personal counseling appointments through our customer service team.

CVC - Central Venous Catheters

Our product range has been revised and now meets international coding standards. In addition to our existing 2- and 3-lumen catheter models, we will increase our product line by a 4-lumen model by the end of this year. With our line of trading products we are able to offer standard sets and individual product compilations in Seldinger technique.

New Sales Representative

Ms. Behr-Ostheimer has recently been assigned as Santec's sales representative for the State of Saxony and Eastern Bavaria. Ms. Behr-Ostheimer has been trained by Erhard Pester, our long-standing representative for this sales area. Mr. Pester will retire on October 1, 2009.
